VEDANTES PISTON

COMPOSTOS | EGR/D

Geral
O Vedante EGR/D é um vedante aplicado no Piston de duplo efeito. É composto por um elemento de vedação em PTFE e um o-ring que energiza o PTFE e lhe fornece estabilidade. O elemento em PTFE permite uma boa vedação, baixo atrito e alta resistência ao desgaste.

Aplicações
Máquinas de moldagem por injecção, empilhadores, plataformas de carga, guindastes, máquinas agrícolas, máquinas de movimentação de terra e válvulas para sistemas hidráulicos e pneumáticos.

Vantagens
– Alojamento simples;
– Grande durabilidade;
– Boa resistência à extrusão;
– Baixo atrito;
– Alta velocidade de movimento linear;
– Vasta gama de temperatura e produtos químicos, dependendo do material o-ring.

Instalação
Este vedante deve ser montado por um técnico especializado. Em primeiro lugar deve ser montado o o-ring e de seguida o elemento em PTFE . Os chanfros necessários no piston e na camisa devem ser isentos de rebarbas e arredondados. É muito importante que as ferramentas de montagem sejam de um material macio e não terem arestas vivas. Antes da instalação, o elemento de vedação e o alojamento devem ser oleados com fluido do sistema.

Condições de Funcionamento

Pressão Máxima	400 BAR
Temperatura Máxima	-30ºC a +105ºC
Velocidade Máxima	0,8 m/s
